-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Oath/Declaration

2. It appears that the date of the JP-2003-108546 in the declaration (i.e., 4/13/2003) does not correspond to the date of the certified copy of Foreign Priority Document (i.e., 4/14/2003). Clarification is required.

Drawings

3. Figures 5-6A-B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: The element 11 of figures 2-4, and elements 7, 15, and 16 of figure 1 do not mention in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the

Art Unit: 2829

description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. The abstract of the disclosure is objected to because the abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. Correction is required. See MPEP § 608.01(b).

6. The disclosure is objected to because of the following informalities:

The new following paragraph have been inserted after the title on page 1:

--- RELATED APPLICATION DATA

The present application is a 371 of PCT/JP04/05269 filed on 04/13/2004. ---

Art Unit: 2829

Appropriate correction is required.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Khoury et al. (u.s.p 6,452,407 heretoafter Khoury).

As to claim 1, Khoury discloses in Figs. 5A-B, 6A-C, and 7A-R a probe (230, 232) coming into contact with an electrode pad (320) of measurement object (300), the probe comprising:

A connection terminal part ("a" portion, or 232 of figure 6A) integrally formed and connected to a substrate (220);

A contact part ("e" of 230) having a tapered configuration (col. 6, lines 55-57);
and

A supporting part ("c" portion of 230) supports the contact part; wherein the contact part ("e" portion of 230) extends from an end of the supporting part has a sectional configuration, which shares at least one side face with the supporting part (figs. 7L-7M).

As to claim 2, Khoury discloses in Figs. 5A-B, and 6A-C, wherein the contact part is formed of an electrically conductive material (nickel "Ni", col. 7, lines 1-5) and

Art Unit: 2829

that Nickel "Ni" is the same material Nickel "Ni" as the one in the instant applicant (see page 4, line 24- page 5, lines 1-5 of the instant applicant). Therefore, that material has superior electric characteristics.

As to claim 3, Khoury discloses in Figs. 5A-B, and 6A-C, wherein the contact part is formed of a metal material (nickel Ni, col. 7, lines 1-5) and that Nickel "Ni" is the same material Nickel "Ni" as the one in the instant applicant (see page 4, line 24- page 5, lines 1-5 of the instant applicant). Therefore, that material has elasticity.

Prior Art of record

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Kim et al 6,414,501 Micro cantilever style contact pin structure.

Yu et al. 6,900,653 Needle fixture of a probe card in semiconductor.

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung X. Nguyen whose telephone number is (571) 272-1967. The examiner can normally be reached on 8:30am-5:00pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ha T. Nguyen can be reached on (571) 272-1678. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
